Thank you for choosing TriggFx to capture the beginning of your great future together. Whether traditional or non-traditional, your wedding can be the most memorable time in your life. That's why choosing the best photographer is important. One of the questions on the questionnaire was "How important is a photographer for your wedding?" It's important, or very important! That's what most of the responses were that came in. Another question was, "Do you have a photographer yet and if not would you consider us?" Most responses were "No, I do not have a photographer. I will consider you." or "No, I do not have a photographer. Let me see the engagement pictures before making my choice." I can respect both answers.

As a photographer, photography is extremely important! Not just taking the pictures, but taking quality pictures. In 2012, I received my Associates Degree in Digital Media and started working solely in photography, later giving my brand the name TriggFx. Shortly after graduation, I started working with models in the glamour industry. After shooting a couple of weddings myself, I can see how rewarding it can be. That is why I am giving this once in a life time offer. I am so confident in my ability to give you the very best images, that I am giving you this free engagement session with an additional offer should you choose TriggFx for your special day. I can only give 5 couples this deal and my schedule will fill up fast. Please do not miss out. This is a great deal and I may never offer this again.

The very first couple with half down that books TriggFx WILL receive a FREE Wedding Album
